SWAT team is out of touch? Can SWAT agents win the day with a bit of help from Special Ops? Intense first-person shooting...

Ready or Not is an intense, tactical, first-person shooter that depicts a modern-day world where SWAT teams are called to handle hostage situations. The gameplay is tense and intense, while the level design and enemy types are both realistic and thoroughly modern. Hijacked and shaken In the United States, SWAT teams were created to be part of the real-life military for emergency situations such as hostage situations. In Ready or Not, you play as one of these real-life SWAT units, but you're not just playing as a soldier in the military. You're also the commander of your own SWAT team. You can choose when and how to use your team's equipment. You can also take cover, and you can even get shot. Ready or Not works for phones, tablets, and computers This game is designed for tablets and smartphones but it will also work fine on a computer. This isn't something that can be done, but our games are usually playable on any platform you'd expect. Also, this game uses only four color palettes: green, red, yellow, and black. If you don't have an RGB monitor, you won't have any problems. 100% free The Ready or Not game is free. You don't need to pay anything to try it out.
